

This question paper contains 4 printed pages]

Roll No.

S. No. of Question Paper : 8712

Unique Paper Code : 253301

C

Name of the Paper : MIHT-304 Virology

Name of the Course : B.Sc. (H) Microbiology (Part II)

Semester : III

Duration : 3 Hours

Maximum Marks : 75

(Write your Roll No. on the top immediately on receipt of this question paper.)

Question No. I is compulsory.

Attempt Five questions in all.

All questions carry equal marks.

1. (a) Give one example for each of the following (any ten) : $1 \times 10 = 10$.
- (i) Terminal cohesive ends
 - (ii) Overlapping genes
 - (iii) Pararetroviruses
 - (iv) Polycistronic RNA
 - (v) Bunyavirus
 - (vi) NRTI
 - (vii) Protease inhibiting antiviral compound
 - (viii) Phycophage
 - (ix) Plant satellite virus
 - (x) Helical symmetry
 - (xi) Nematode transmitted virus.

P.T.O.

(b) Expand the following abbreviations (any five) :

$1 \times 5 = 5$

- (i) RNP
- (ii) ORF
- (iii) HCC
- (iv) BSE
- (v) CCCVd
- (vi) HTLV.

2. Define any ten of the following terms :

$1 \frac{1}{2} \times 10 = 15$

- (1) Nucleocapsid
- (2) Apo-receptor
- (3) CPE
- (4) DI particle
- (5) Neutralizing antibody
- (6) Multivalent Vaccine
- (7) Direct repeats
- (8) Anchorage dependency
- (9) Multipartite virus
- (10) Circular permutation
- (11) Transtadial transmission
- (12) Carcinoma

3. (a) Give properties of a regular icosahedron structure of viruses. 2
 (b) Discuss the modes of entry of animal viruses with examples. 4
 (c) Discuss the genome replication of Vaccinia virus. 5
 (d) Give the contributions of the following scientists (any four) : 1x4=4
 (1) Howard Temin
 (2) Theodor Diener
 (3) Albert Sabin
 (4) John Enders
 (5) Harold Varmus.
4. (a) What are Viroids? Discuss their mode of replication. 4
 (b) Discuss the mode of oncogenesis in Papilloma virus. 5
 (c) Discuss the mode of action of Amantadine and Enfuvirtide. 4
 (d) Differentiate between Lambda and P1phage. 2
5. (a) Differentiate between any four of the following : 4x3=12
 (i) Horizontal and vertical transmission
 (ii) Live and killed vaccines
 (iii) Lytic and lysogenic cycle
 (iv) Proto-oncogene and viral oncogene
 (v) Density gradient and Differential centrifugation
 (b) Describe the retrograde theory of viral origin with its merits and demerits. 3

6. (a) Discuss the role of viruses in gene therapy. 3
- (b) Explain the technique of phage display and give any two of its applications. 3
- (c) Differentiate between the following viral families : 3 \times 2=6
- (i) Retroviridae and Hepadnaviridae
- (ii) Microviridae and Myoviridae
- (d) Discuss the method for vaccine production for Hepatitis B virus. 3
